20 PhD Fellowships for 2017 available within the ICFO INTERNATIONAL PhD PROGRAM (Barcelona)

Our International PhD Fellowship Program welcomes applications from individuals with a degree in a field of science and engineering related to the ICFO research activities. Fellowships will be offered across all ICFO research groups in the following research areas:

- Graphene physics and nanomaterials
- Nonlinear Optics and atom optics
- Atto-science and ultrafast physics
- Biomedical optics and biophotonics
- Nanotechnology and nanophotonics
- Quantum optics and quantum information
- Optical sensing and optoelectronics
- Green technologies and photovoltaics
- Single-molecule physics
- Advanced laser technology

PhD students benefit from state-of-the-art research facilities, a stimulating international and interdisciplinary environment, broad-scope scientific and technical training, extensive mentoring, and widespread opportunities for professional and personal development.

For further details, please see [http://phd.icfo.eu](http://phd.icfo.eu)

Apply by March 26, 2017
